Auditing basics- 2015

Called to Account-Paul M. Clikeman 2013-07-24

Selected as an Outstanding Academic Title by Choice Magazine in 2014! Called to Account takes a broad perspective on how financial frauds have shaped the public accounting profession by focusing on cases of fraud around the globe. Ever entertaining and educational, the book traces the development of the accounting standards

and legislation put in place as a direct consequence of these epic scandals. The new edition offers updated chapters on ZZZZ Best and Arthur Andersen, plus new chapters devoted to Parmalat, Satyam, and The Great Recession. Through stories like Barry Minkow's staged constructions sites and MiniScribe's fake inventory number generating computer program, "Cook Book", students will learn that fraud is nothing new, and that financial reform is heavily influenced by politics. With discussion questions and a useful chart showing instructors and students how each chapter illustrates the topics covered in other textbooks, Called to Account is the ideal companion for any class in auditing, advanced accounting or forensic accounting.

Sports Finance 2018-Angel Barajas 2019-10-16

Sports economics is a relatively new field of research that is experiencing rapid growth in the economics literature. The importance of the

sports industry to economies coupled with the availability of financial and productivity data have made the study of sports economics a useful avenue for exploring research questions that have eluded mainstream economics fields. The main goal of this Special Issue of the International Journal of Financial Studies is to encourage theoretical and applied research in sports economics, which is of interest to both academics and practitioners. For this purpose, this Special Issue on "Sports Finance" invites papers on topics, such as, but not limited to, salary determination, ticket pricing, revenue sharing, salary caps, competitive balance, new stadium financing, rival league behavior, determinants of revenue, television and media, tournament prize structures, financial distress in professional sports, financial fair play, financial control of sports

The CPA Profession-Harry T. Magill 1998

A core text for undergraduate/graduate-level courses in professional ethics; a supplement for intermediate/advanced-level accounting; or core text in professional practice seminars courses. Innovative in perspective, this text explores the non-technical dimension of the profession of accountancy and the duties and responsibilities assumed by its practitioners specifically

by certified public accountants (CPAs). Part I provides an orientation to the profession; Part II explores the legal, regulatory, and social environments in which the CPA practices and their problems and challenges; Part III focuses on the traditional and the evolving market-drive services provided by CPAs; and Part IV surveys future trends and challenges.

Auditing and Other Assurance Services-Alvin A. Arens 2002-07

Appropriate for courses in Auditing and Special Topics in Accounting at the college or university level. Auditing is a second-year (upper-level) course directed at students in pursuit of a professional accounting designation-CA, GGA, and CMA. This innovative and easy-to-understand bestseller offers a mixture of auditing theory and practical applications for those who

will work for auditing firms. It provides thorough coverage of the entire audit process, taking the reader step-by-step through an audit cycle, then showing how the process relates to all audit cycles. Reflecting the reality of today's working world, particularly the impact of technology on auditing procedures and techniques, the text has been thoroughly revised and updated, and is completely oriented to the practical application of computers in the field of auditing. It addresses five major issues in this area that have imposed change on the auditing environment: use of computer systems by audit clients; types of computer-based systems used by audit clients; form of working papers used in general practice; student knowledge of automated systems; and integration of automated systems into the review questions, problems, and cases.

Students will learn not only auditing procedures, but also how to analyze data.
