Dec 03, 2021 · The OpenCV library was built using C and C++ programming languages. So, to be able to use OpenCV using C#, we need to use a wrapper written using C#, which allows us to communicate with the OpenCV library and all its underlying APIs. The most popular wrapper is Emgu CV, and we are going to discuss how to use OpenCV C# using this wrapper.

Mar 06, 2012 · Hi, Ive been

trying to make work your matlab code with a rotated image by 30 degree (only rotation no translation). I use a SIFT algorithm to detect common feature points in both images and then I apply your script (with those points as the input points) to try to get the applied rotation (30deg) and I get that a traslation has been applied as well.
