Introduction to xlrd module. The xlrd module may be used to obtain data from a spreadsheet. Python, for example, may be used to read, write, or alter data. In addition, the user may be required to travel through several sheets and extract data based on some criteria, as well as edit some rows and columns and perform a great deal of labor.

The xlrd Module – How To Handle Excel Files In Python?

Dec 11, 2020 · As noted in the release email, linked to from the release tweet and noted in large orange warning that appears on the front page of the documentation, and less orange, but still present, in the readme on the repository and the release on pypi:. xlrd has explicitly removed support for anything other than xls files. In your case, the solution is to: make sure you are on a ...

xlrd.biffh.XLRDError: Excel xlsx file; not supported

Handling of Unicode¶. This package presents all text strings as Python unicode objects. From Excel 97 onwards, text in Excel spreadsheets has been stored as UTF-16LE (a 16-bit Unicode Transformation Format). Older files (Excel 95 and earlier) don’t keep strings in Unicode; a CODEPAGE record provides a codepage number (for example, 1252) which is used by xlrd to ...

Handling of Unicode — xlrd 2.0.1 documentation

Nov 01, 2015 · @darshanlol If you follow the various threads, you'll find that there are valid Excel files that cannot be read by Pandas, and that no one thinks this is a bug.. Pandas support will say that it's an xlrd problem, not a pandas problem, and will close (this) thread; xlrd here will say, "the file has been saved as "XML Spreadsheet (*.xml)" i.e. NOT in XLS or XLSX format, not ...
